

BackPak[®] Software Suite

Open Options for NonStop Tape

Andrew Hall

VNUG

Infrastructure Objectives

- Consolidation (Green Data Center)
- Centralization of Operations Staff
- Client / Server Storage Management
 - Tivoli TSM, NetBackup, NetWorker
- VMware, Private & Public Clouds
 - “Adaptive Infrastructure”
- Data Deduplication / Encryption

ETI-NET Product Family

- BackHome[®]
- BackBox[®]
- BackPak[®]

Software and hardware to integrate
NonStop with prevailing data center
infrastructure objectives

BackHome®

- Network-based Backup/Restore
- SNA → TCP/IP
- Disk-to-Disk Performance
- IBM Target / Mainframe Tape
- First Customer – UBF - 1989
- Latest deployment – June 2009

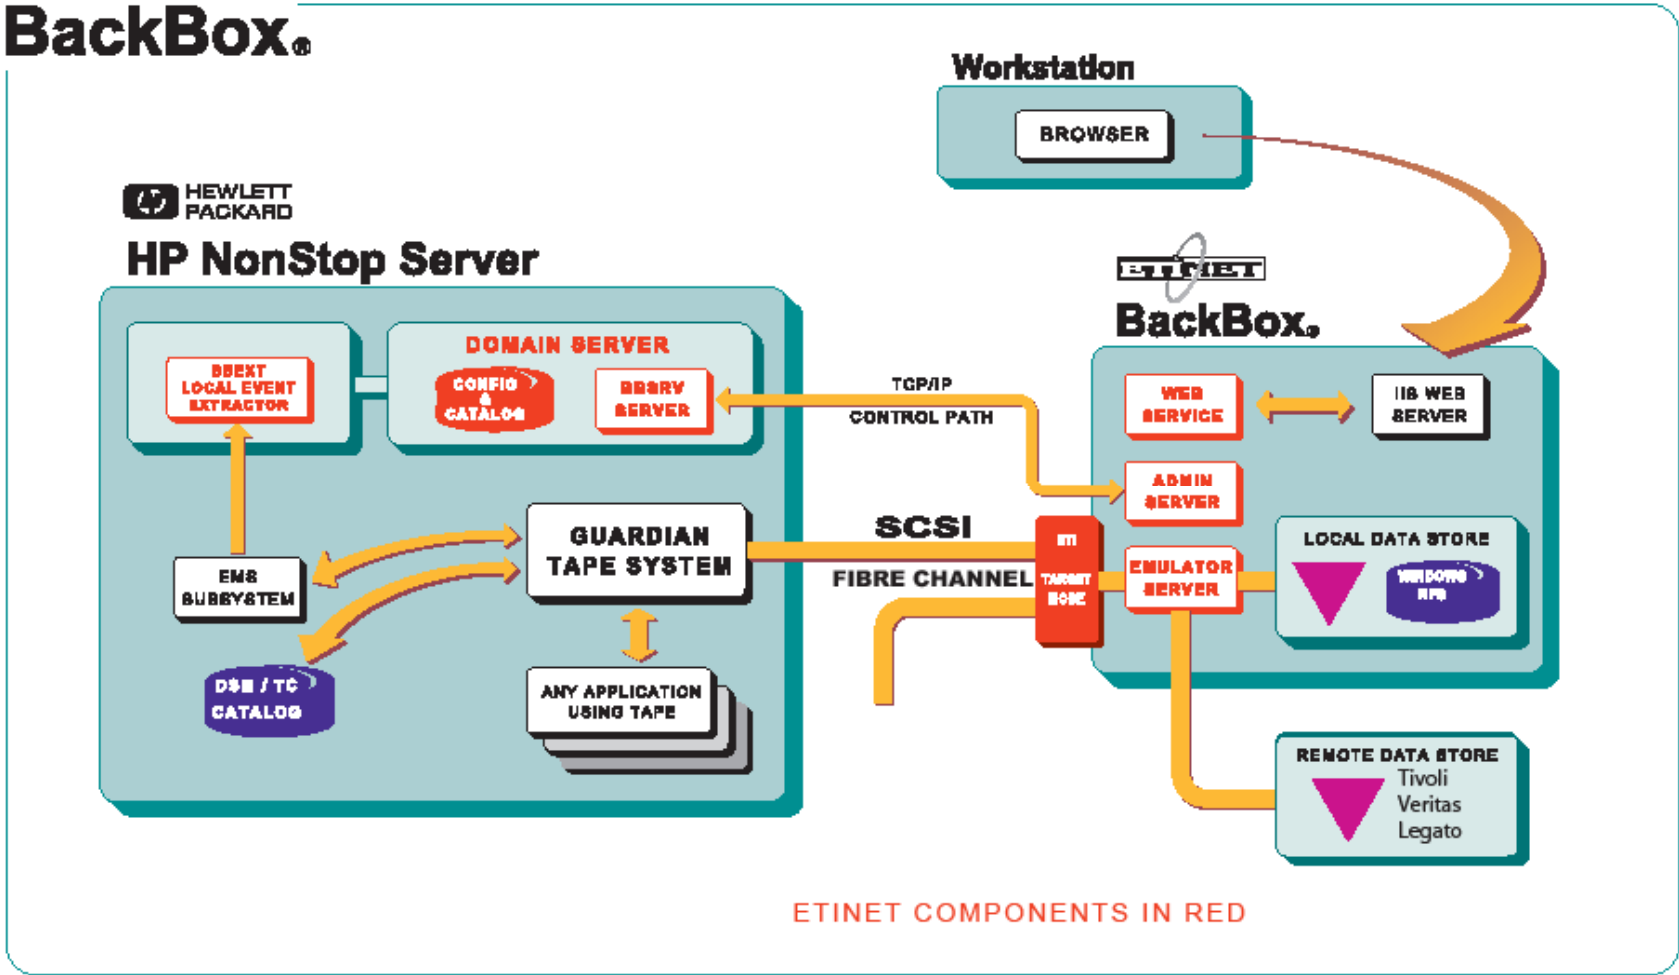

BackHome/TSM®

- Client / Server Backup/Restore
- Tivoli Storage Manager API in NonStop
- Policy Managed Object Lifecycles
- Centrally Managed Vaulting
- First Customer - 1995
- Worldwide Customers

BackBox®

- NonStop-based Management Software
 - Configuration
 - Integrated Interfaces (DSM/TC, Mediacom, Zsvr)
 - Script Management
- Fibre or SCSI channel I/O
- Context-free “VTC” controllers
- Open storage / open storage management
- First Customer – 2004
- Only De-dup solution for NonStop
- Happy Worldwide Customers
 - Component of flagship HP projects
 - Widely adopted in managed data centers

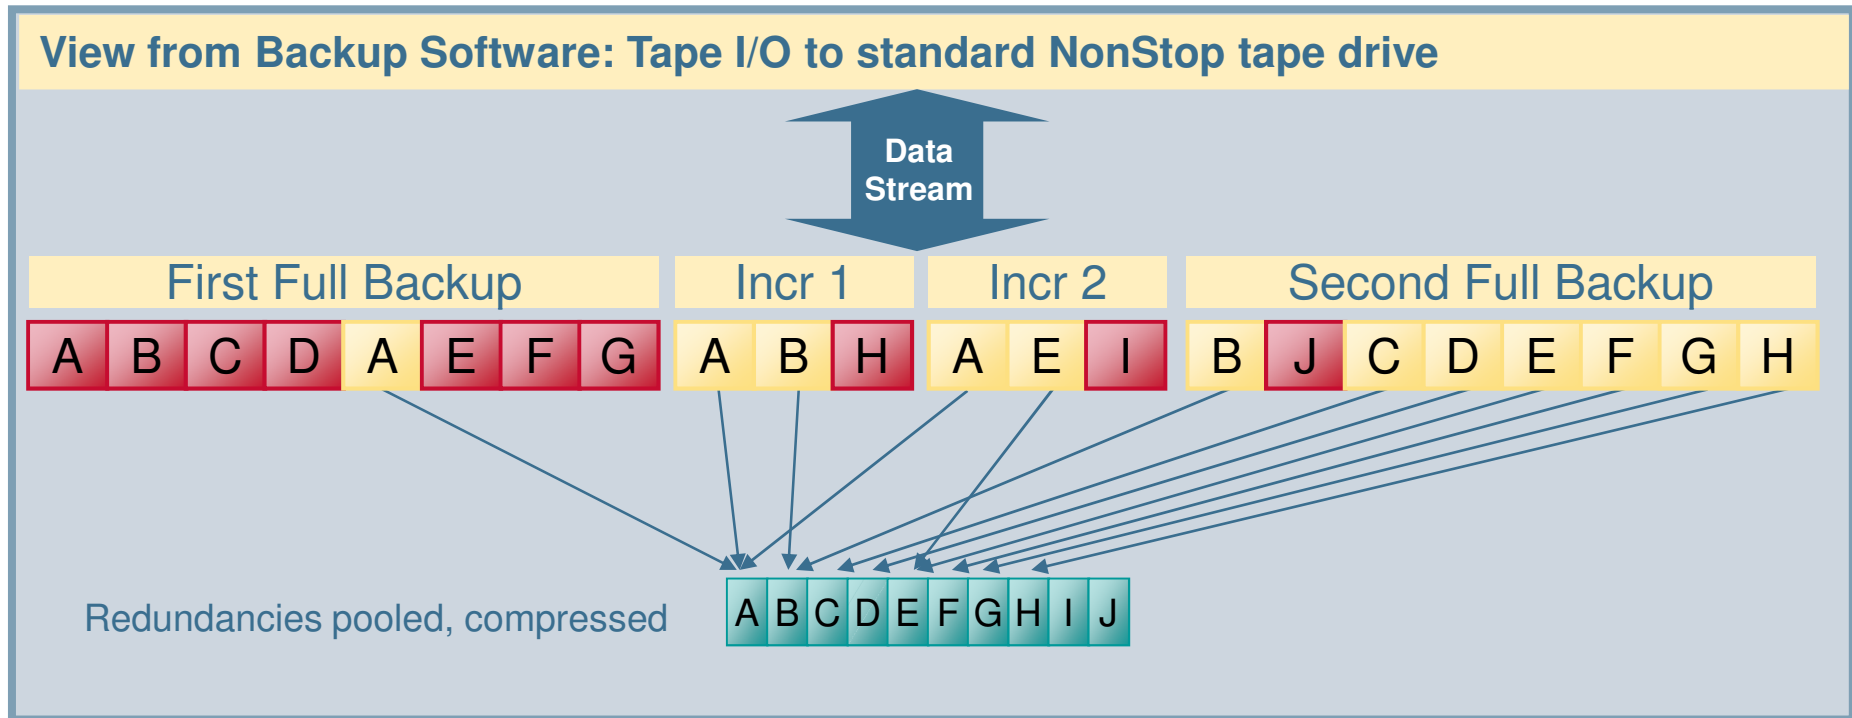

BackBox.

BackBox®

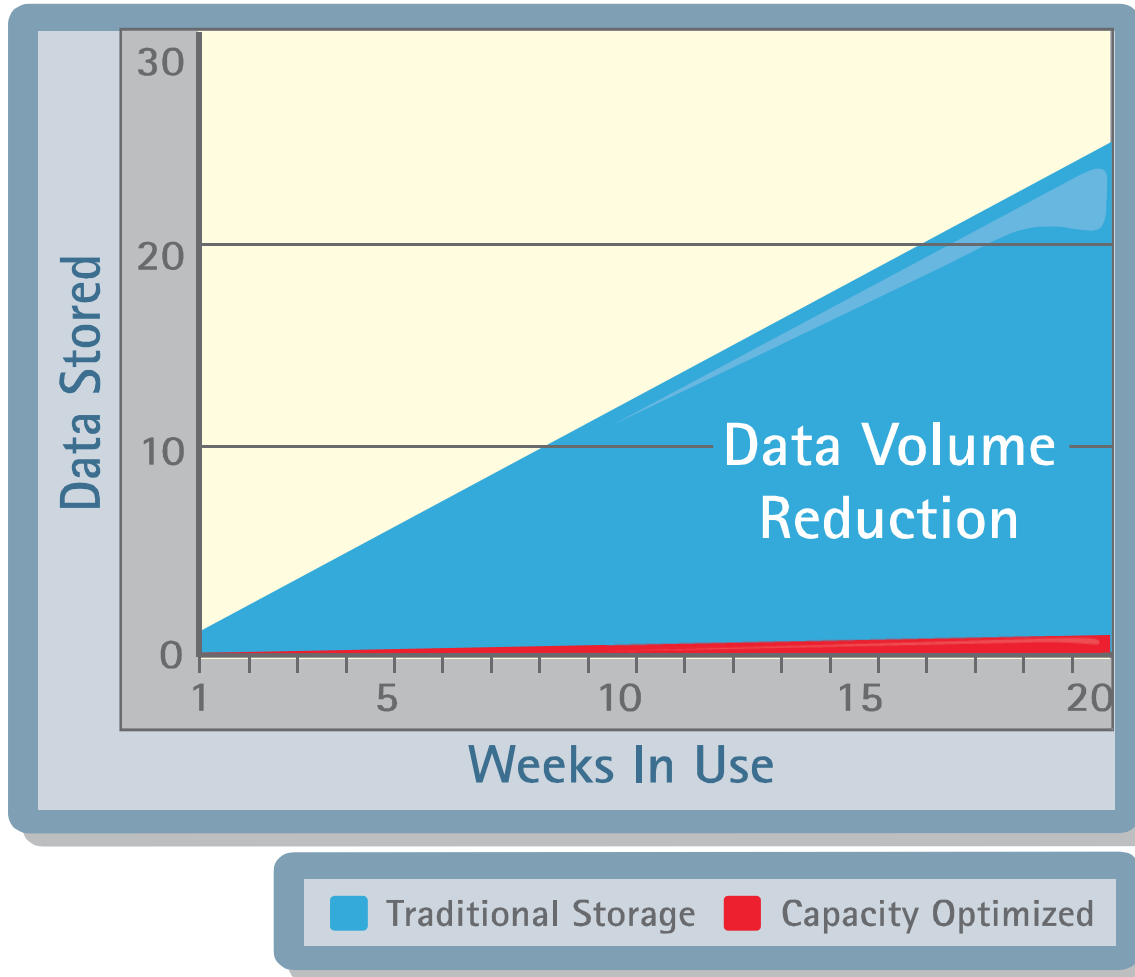

- NonStop-based Management Software
 - Configuration
 - Integration Interfaces (DSM/TC, Mediacom, Zsvr)
 - Script Management
- Fibre or SCSI channel I/O
- Context-free “VTC” controllers
- Open storage / open storage management
- First Customer – 2004
- **Only De-dup solution for NonStop**
- Happy Worldwide Customers
 - Component in flagship HP projects
 - Widely adopted in managed data centers
 - Popular in Australia

Deduplication: Under the Hood

-  = Unique variable segments (4KB-12KB)
-  = Redundant data segments
-  = Compressed unique segments

Data Reduction Impact Over Time

•Reduction Factor

•3-4x

First full backup

•6-7x

File-level incrementals

•50-60x

Subsequent full backups

•30x

Aggregate weekly fulls, daily incrementals

Legacy Tape Server

Fibre-Channel BackBox VTC
with currently supported, media
compatible SCSI tape drives

- On demand import of physical tapes
- No need to migrate vaulted inventory
 - NS access to S-series tape archives

New Product: BackPak[®]

“BackBox without the Box (our box)”

VNUG

BackPak[®]

“Common Standards / Uncommon Advantages”

VNUG

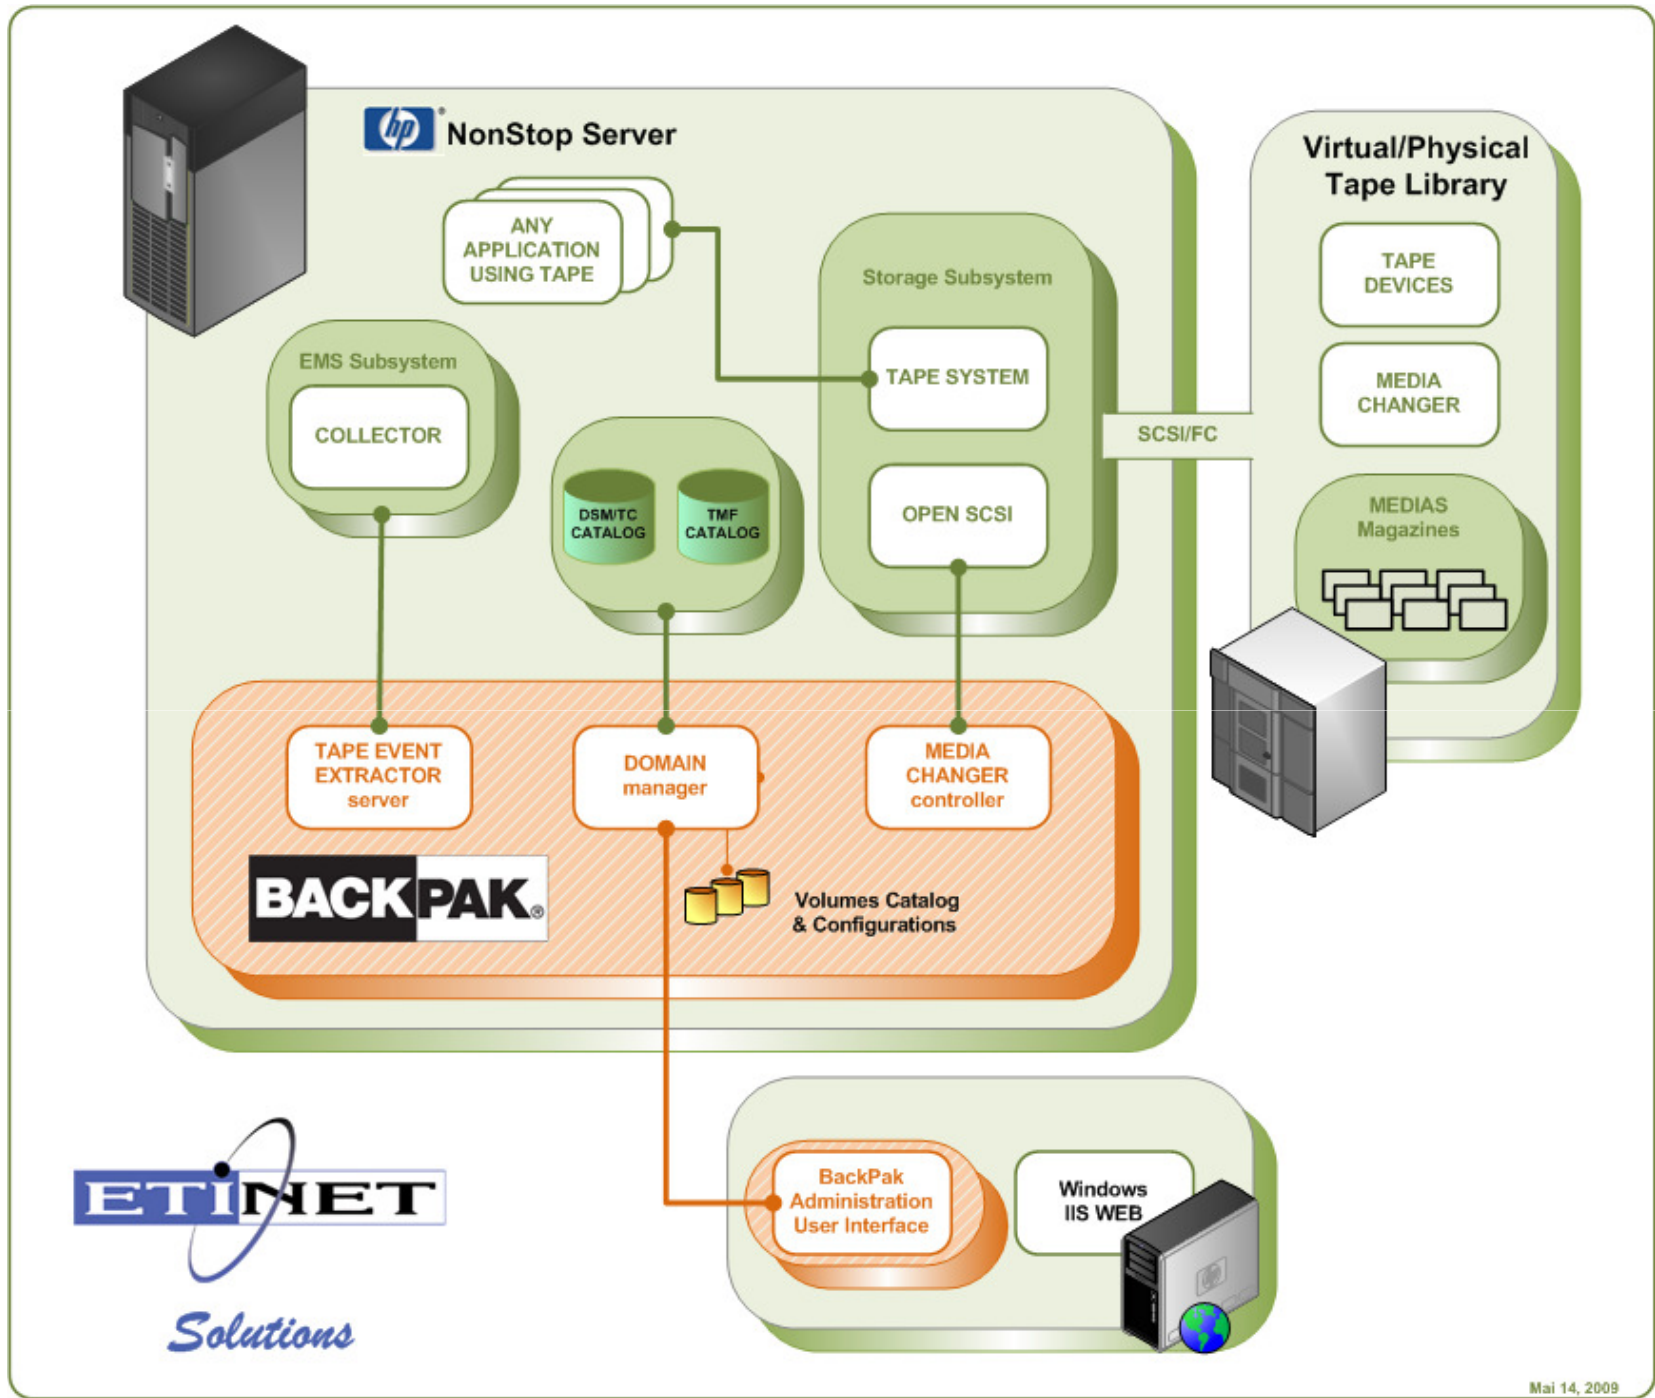

BackPak[®]

- NonStop-based Management Software
 - Configuration
 - Operations Interfaces (DSM/TC, Mediacom, zsvr)
 - Migration Managers (pre-fetch, import/export, etc)
- Fibre or SCSI channel I/O
- Industry leading VTL libraries
 - HP StorageWorks VLS 6600
 - IBM ProtecTierTS7650
 - FalconStor
 - Quantum DXi / EMC EDL / Sun STK
- Deduplication / Encryption / Physical Tape vaulting
- Released @ HPTF June 2009

BackPak®

- NonStop-based Management Software
 - Configuration
 - Operations Interfaces (DSM/TC, Mediacom, Zsvr)
 - Migration Manager
- Fibre or SCSI channel I/O
- Industry leading VTL libraries
 - HP StorageWorks VLS
 - IBM TS7650 ProtectTier
 - FalconStor
 - Quantum/EMC/Sun
- Deduplication / Encryption / Physical Tape Vaulting
- Released @ HPTF June 2009
