HP's strategy

Seamless, secure, context-aware

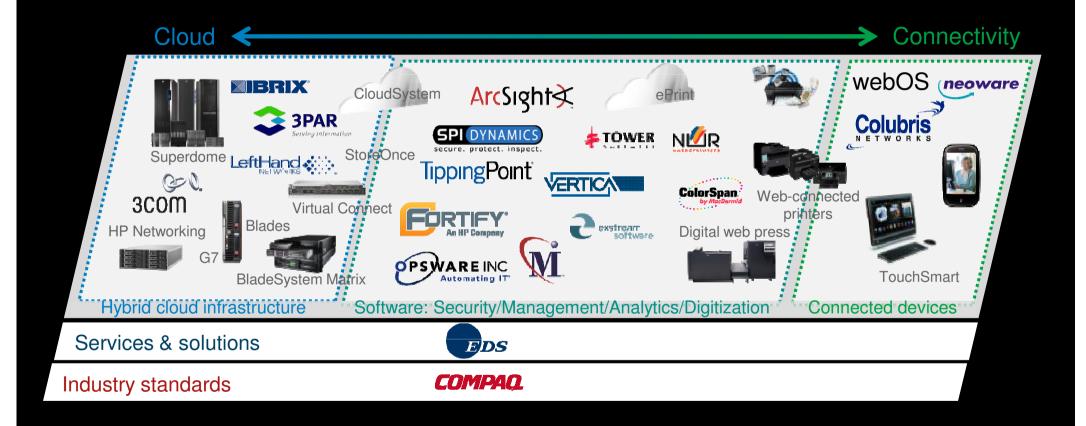

- Optimize traditional environments
- Build and manage cloud-based architectures
- Enable seamless transformation to hybrid models
- Define and deliver the connected world from the consumer to the enterprise

Leading portfolio for an evolving marketplace

Investing in growth ahead of industry trends

INNOVATION

HP Labs

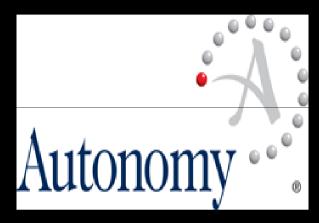

HP to acquire Autonomy

Establishing leadership position in large and growing space

Autonomy is a global leader in infrastructure software for the enterprise with a customer base of more than 25,000 global companies, law firms and public sector agencies, and approximately 2,700 employees worldwide.

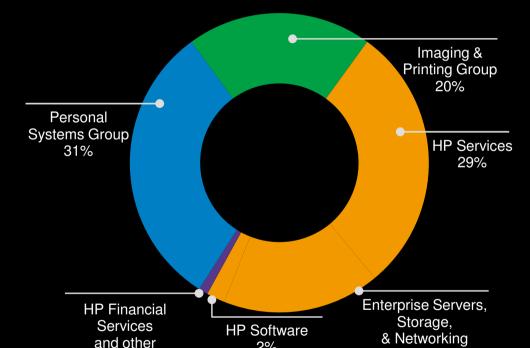

"Autonomy is the proverbial 900 pound gorilla of the enterprise search market. The vendor is an order of magnitude larger than most other peers in ESR and delivers the most sophisticated and comprehensive search functionalities. It's built on Intelligent Data Operating Layer (IDOL) server, which is a high end information access platform."

Strong financials, poised for growth

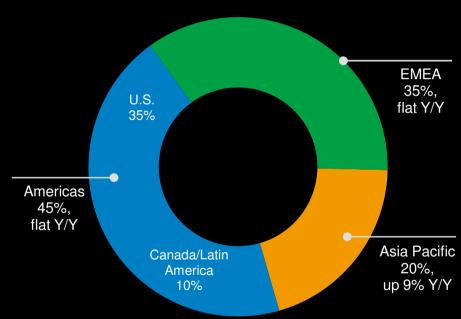

Q3 FY11 revenue: \$31.2B
